

We'll put your Mac in business.

Microsoft has got what the Macintosh™ needs to hold down a job. And on top of that, we've got it on sale.

The Business Pack Introductory Offer: \$595.*

Here's everything you need to do real work, and less. \$115 less.

We're offering savings on our entire family of business programs.

The Microsoft® Business Pack includes: Microsoft Word, Mac's only professional word processing program. Microsoft File, a versatile information manager that lets you combine graphics and data. Microsoft Chart, a presentation quality graphics program. And Microsoft Multiplan™, the spreadsheet for the Macintosh.

A close-knit family.

These four powerful programs perform the four

essential functions needed to run a business. But they don't work in isolation. They easily pass information back and forth between them.

And all use the same command structure.

No other company's software can compare to this mega business package. And it all works on either the 128K or the 512K Macintosh. But then, we've written more Macintosh programs than anybody; nobody knows their way around one better. We take Mac to the max.

This promotion lasts only 'til April 15th. So if you want to make your Macintosh work for a living, hurry and call (800) 426-9400. In Washington State, Alaska, Hawaii and Canada, call (206) 828-8088.

Ask for the name of your nearest Microsoft dealer. And give a computer a career.
