

# For those who appreciate the uses of power.

You may speak more softly now.  
For we are delivering into the hands of business,  
a very big stick.

Microsoft® Excel for the Macintosh™. A financial  
analysis tool of unprecedented power.

First and foremost, Microsoft Excel is the most  
formidable spreadsheet ever to run on a personal  
computer.

A spreadsheet which is in turn linked in har-  
mony with an extraordinary graphics program

and a highly capable data filing application.

These already considerable powers are magnified  
geometrically by Macros.

Which give Microsoft Excel the capacity to learn  
your most complex routines. And activate them  
with a single keystroke.

Yet for all its ability, Microsoft Excel is simple  
to learn, simple to use. No complex commands to  
memorize. No classes to take.

The only thing complicated about Microsoft

Excel is the problems it can solve.

See your Microsoft dealer for a demonstration  
of the powers of Microsoft Excel.

In the right hands, a potent weapon, indeed, in  
the cause of commerce.

We trust you will use it responsibly.

## Microsoft® Excel

The rest are history.
