

# Macintosh II Two-Page Monochrome Video Card and Expansion Kit

## Overview

The Apple® Macintosh® II Two-Page Monochrome Video Card provides the interface between the Apple Two-Page Monochrome Monitor and the Macintosh II computer. It allows for true gray-scaling, displaying as many as four levels of gray at the same time.

The optional Macintosh II Video Card Expansion Kit can increase the display capabilities of your Apple Two-Page Monochrome Monitor to 16 gray levels.

## Features

- ▶ Up to four shades of gray at one time
- ▶ Optional 4-bit expansion kit
- ▶ Adjustable display modes
- ▶ NuBus™ compatible
- ▶ RS-170 capability

## Benefits

- ▶ Offers true gray-scaling for enhancing graphics, scanned images, and documents.
- ▶ Increases the display capability to 16 gray levels.
- ▶ Lets you use the computer's Control Panel to select 2, 4, or 16 gray levels.
- ▶ Plugs into any Macintosh II slot.
- ▶ Is self-configuring.
- ▶ Provides interlaced video output compatible with many types of video equipment.

# Macintosh II Two-Page Monochrome Video Card and Expansion Kit

## Product Details

### Software-selectable display modes

Using the Control Panel desk accessory, you can set the Macintosh II Two-Page Monochrome Video Card to display 1 or 2 bits per pixel. This provides, respectively, 2 or 4 gray levels on the Apple Two-Page Monochrome Monitor.

The ability to set a two-level display ensures that monochromatic Macintosh applications can operate as quickly as possible.

### Optional 4-bit upgrade

The Macintosh II Two-Page Monochrome Video Card has a display capability of 2 bits per pixel. Upgrading this

to a 4-bit-per-pixel display with the Video Card Expansion Kit lets you view up to 16 gray levels on your monitor's screen simultaneously. The upgrade consists of eight video RAM chips, which fit into sockets on the Macintosh II Two-Page Monochrome Video Card.

## System Requirements

To use the Macintosh II Two-Page Monochrome Video Card, you need:

- ▶ A Macintosh II personal computer with an available NuBus slot

## Technical Specifications

### Interface

- ▶ NuBus—plugs into any Macintosh II slot

### Output signals

- ▶ Modes: RGB (analog) and gray scale
- ▶ Video: RS-343 standard and RS-170 timing-standard interlaced video
- ▶ Sync: separate sync, negative-going, TTL

### Connector

- ▶ D-style with three internal coaxial connectors and 10 pins

### Display modes

- ▶ 1 or 2 bits per pixel (2 or 4 gray levels)
- ▶ Upgradable to 4 bits per pixel (16 gray levels) with the Macintosh II Video Card Expansion Kit

### Raster rates

- ▶ Vertical: 75 hertz
- ▶ Horizontal: 68.7 kilohertz
- ▶ Dot clock: 100 megahertz

### Power consumption

- ▶ 10 watts

## Ordering Information

### Macintosh II Two-Page Monochrome Video Card

Order No. M0260

With your order, you'll receive:

- ▶ Macintosh II Two-Page Monochrome Video Card
- ▶ Extended ADB keyboard cable
- ▶ Limited warranty statement

### Macintosh II Video Card Expansion Kit\*

Order No. M0213

With your order, you'll receive:

- ▶ Expansion kit—eight video RAM chips
- ▶ Limited warranty statement

\*Dealer installation is required.
