

250 nsec. chips—5375

Z-80A 4 Mhz. Fast — This fully assembled and tested 16K board was designed to operate without wait states in a 4 Mhz. Z-80A system allowing over-generous time for CPU board buffers. It "loafs along" in slower 8080 and 8085 systems.

450 nsec. chips—5325

For 2 Mhz. Systems — Same circuit as above but priced lower because of less expensive memory chips. It is fully assembled, tested, guaranteed and is priced lower than most kits.

Fully Static is Best — Both boards use the state-of-the-art Texas Instruments TMS 4044 which requires no complicated and critical clocks or refresh. The fully static memory chip allows a straight-forward, "clean" design for the board with a single 8 volt power supply using 1.6 amps nominal.

Fully S-100 Bus Compatible — Each 4K addressable to any 4K slot and separately protected by DIP switches. Jumpers to customize board to any known S-100 system.

Commercial Quality Components — First quality factory parts, fully socketed, buffered, board masked on both sides, silk-screened, gold contacts, bus bars for lower noise.

Guaranteed — Parts and labor guaranteed for one full year. You may return undamaged board within ten days of receipt for full refund.
