

# Microcomputer Networking From Digital Research

**CP/NET™ brings CP/M® based networking to the microcomputer world.**

Now you can use CP/M, Digital Research's "industry standard" operating system, in a network environment. In conjunction with MP/M™, our high-powered multi-user system, a variety of CP/NET configurations allow you to share your valuable resources among a number of masters running MP/M, and slaves running CP/M or MP/M.

- **Share and transfer disk files**
- **Share printers and consoles**
- **Share programs and data bases**

As with all Digital Research products, CP/NET is compatible with a large variety of computer hardware, allowing a network to be constructed with any combination of shared memory, parallel I/O or serial links with any protocol.

For the office or the classroom, as well as the application development environment, contact Digital Research or your hardware supplier to find out how CP/NET can enhance your system's flexibility and convenience.
