16K BYTE 8/16 RAM

This fully static RAM board offers you the best of two worlds. Automatically switches between 8-bit or 16-bit operation, depending upon your CPU. High reliability, low noise design. 200 nsec. chips allow 8 Mhz. 8086 operation. Has extended addressing which can be disabled by a single switch. Prices: 1-9, \$280; 10-19, \$260.

OTHER RAM SAVINGS

16K PLUS RAM—this fully static RAM has become the standard of the industry. It features 200 nsec. chips and Cromemco style bank select using port 40H. Addressable to any continuous 16K on 4K boundaries. Any 4K block may be disabled. High reliability, low noise design. Prices: 1-9, \$280; 10-19, \$260.

16K STANDARD RAM—this fully static RAM is frequently used by OEMs in systems which do not require bank select. High reliability, low noise circuits. Uses 200 nsec. chips. Addressable to any continuous 16K on 4K boundaries. Any 4K block may be disabled. Prices: 1-9, \$265; 10-19, \$245.

64K STATIC 8/16 RAM

AVAILABLE JULY 6—This state-of-the art board uses 2167 16K static 70/100 nsec. chips in a "power down" mode. This means you can expect the first 64K in a system to use 1.6 amps with subsequent boards using about .8 amps each. Built for the same high reliability you have come to expect from using our other boards. Has 24-bit extended addressing which can be disabled. Initial quantities will be limited—reserve yours now to ensure early delivery. Prices: 1-9, \$1295; 10-19, \$1195.

All products fully assembled and guaranteed for one year.
