

# Radio Shack's TRS-80<sup>®</sup> Model III is Your Best Buy in Desktop Computers.

\$2495

## Because You Get 48K at Last Year's 32K Price!

That's right, we've added 16K more memory, but kept the price at a low \$2495! The TRS-80 Model III is a *complete*, ready-to-run desktop computer packed with "extras" that don't cost extra:

**Two Double-Density Disk Drives.** You get two *built-in* 175K disk drives, and can add up to two more externally.

**BASIC in 14K ROM.** Our powerful Model III BASIC provides a program line editor, machine language programming, real time clock, and more. Compatible with most Model I/Level II BASIC programs, too. Plus, you can expand with COBOL or Compiler BASIC any time.

**Upper and Lower Case Characters.** With a special graphics character set, and 64 characters-per-line format.

**Built-In Monitor.** 12" high-resolution.

**12-Key Datapad.** As well as repeating keys and keyboard-controlled screen print.

**Parallel Printer Port.** Add one of our printers anytime.

**RS-232 Serial Interface.** For data communications, just add a modem.

**Nationwide Support.** Backed by 6100 Radio Shack stores and dealers, 160 Computer Centers and 160 service centers throughout the USA.

**Available Now.** Why pay more? Get a demonstration today. Also check out our

\$999 16K Model III—it's a perfect "starter" system.
