

64K Static RAM

available now from stock

Ultra Fast - 100 nsec. chips

Fast access allows memory management manipulation without wait states.

8/16 - 8 or 16-bits wide

Dynamically switches data path width per IEEE Standard.

Low Power

Typical power consumption less than 2 amps for active board. Less for power down boards.

Extended Addressing

24-bit IEEE addressing allows 16-megabyte range. Single shunt changes to 16-bit addressing.

Fully Static

No clocks, no refresh required for easy DMA use.

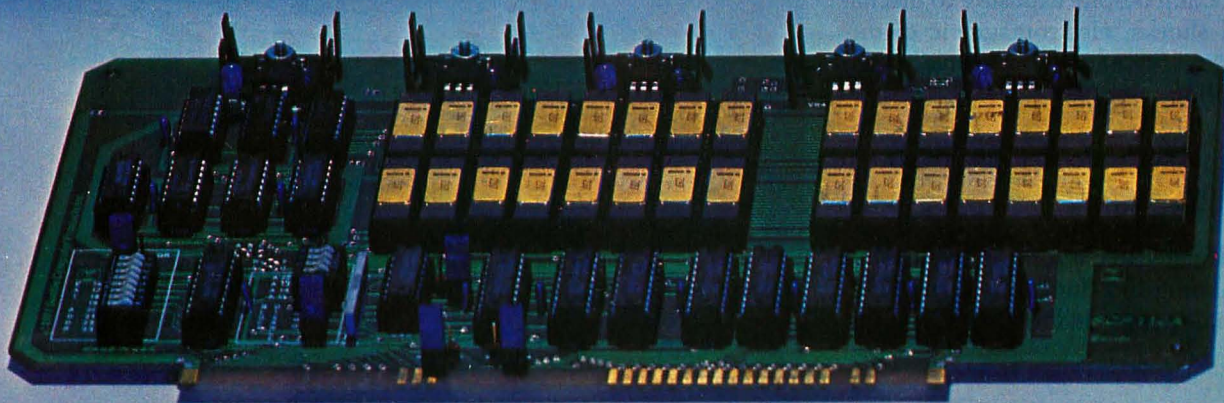

Special Features

Any 4K block can be disabled. Or, can disable everything above or below any 4K boundary. Available in 16K increments for OEM quantities.

\$1,295

100 nsec. Chips - Qty. 1-9

OEM & Dealer prices also available.
