

Now you can give your child a real advantage... THE ATARI® 400™ HOME COMPUTER

Having an ATARI Home Computer will help make learning fascinating for your child. Learning conversational languages, computer programming—even Touch Typing. Or how about learning geography with the ATARI "States & Capitals" program? You can even simulate a nuclear power plant with a unique program called SCRAM™ or enjoy other simulation programs like Energy Czar™, Kingdom™ and Hangman.

The ATARI Home Computer lets your child progress at his or her own pace. So discovery is fun, never boring or confusing. Your child's most important discovery may be the computer itself... a world that will become a major part of his life through college and into adulthood.

But the ATARI Home Computer is more than a great teacher. It's a challenging way for your whole family to relax and have a good time—battling with Space Invaders*, Star Raiders™, Asteroids™ or Missile Command™.

Still, we've just scratched the surface of the ATARI Home Computer's capabilities.

It can bring you a world of information, and actually help you organize your life, too. All in 128 brilliant colors, with rich, imaginative graphics and sound capabilities.

How much will an ATARI Home Computer cost you? Surprisingly close to what you paid for the T.V. you'll hook it up to.

We've Brought The Computer Age Home.™
