the IBM® PC and XT right off the shelf. Which brings us to the next point.

The COMPAQ DESKPRO is the fastest truly compatible desktop you can buy. It's two to three times faster than the industry standard. That saves time now. And in the future, as software becomes more sophisticated and integrated, it will save you even more time as well as protect your personal computer investment.

But there's more. We gave the COMPAQ DESKPRO one other feature not found on any other machine. You can choose between an amber or green dual-mode monitor that displays high-resolution text *and* graphics with equal brilliance, saving you the cost and clutter of a second monitor.

See the Dream Computer. Then pinch yourself. It's for real.
