

...but we didn't.

Introducing the new COMPAQ PORTABLE 286¹ More features, more speed...more useful.

Most people think the IBM[®] Personal Computer-AT[™] can do more than any other personal computer. But now COMPAQ[®] offers a personal computer that does more in a package *half* the size, complete with a handle.

Incredibly fast

Most computer companies would consider it a breakthrough to make a computer with the power and speed of the IBM PC-AT. But not COMPAQ. The new COMPAQ PORTABLE 286 runs all the popular programs 30% *faster*.

And no doubt most would have been elated to put 20 Megabytes of fixed disk storage in a portable computer. But we didn't stop there. We designed the COMPAQ PORTABLE 286 to accept an internal fixed disk drive back-up system as well. It protects your data on pocket-sized tape cartridges, something not even the IBM PC-AT can do.

Room to grow

Once we got started, it was hard to stop. There's room for up to three internal storage devices. Choose from 1.2-Megabyte or

360-K byte diskette drives, the fixed disk drive and fixed disk drive back-up.

Add up to 640-K bytes of memory on the main board. Then add up to 2 more Megabytes using an expansion board. That gives you more memory than most desktop computers.

For displaying your work, a built-in monitor shows high-resolution text *and* graphics. A second monitor isn't necessary.

Does more—anywhere

Together, all these features add up to our fastest, most powerful portable computer. It helps you do more, in more places.

Of course, if you need a computer with even more power, we designed a model that stays in one place.

The new COMPAQ DESKPRO 286[™]. With up to 8.2 Megabytes of memory and 70 Megabytes of storage, it can take you beyond today's limits of desktop personal computing.

COMPAQ offers personal computers beyond compare. Because we make them without compromise.
