

# Introducing the new and improved IBM PC. \$49<sup>95</sup>

Actually, it's not a new IBM® PC. It's GEM DESKTOP™. The \$49.95 software — breakthrough that makes your old IBM PC so astonishingly easy to use that it seems like a new one.

## So long PC DOS, hello GEM.™

GEM DESKTOP software looks like an ordinary floppy for your PC. But slide it into your IBM's disk drive, and the change begins.

From this moment on, you can run most of the important PC programs—but instead of typing cryptic commands to get into your program menu, you simply point and click your mouse\* or use your cursor keys to open a window. It's like a breath of fresh air compared to the complex PC DOS operating system you've been using.

## Point and click vs. stroke, stroke, stroke.

Next, instead of typing and retyping long file names, you simply point and click again at the appropriate symbols. And voila! Your file appears on screen. But it's not quite the same screen you've been used to.

Simple menu headers at the top to guide you effortlessly from one function to the next. So instead of making more complex keystrokes that can easily be mistyped, your IBM PC is easier and faster to use than ever before. There is also a clock and a calculator both built right in.

## Indispensable. And only \$49.95.

Your GEM Desktop includes all operating system interface software and comes with amazingly simple instructions. In fact, GEM DESKTOP software makes it possible, for the first time, for anyone to learn to use an IBM PC. (Who knows, maybe even the most dedicated computerphobes in your company will warm up to the PC, after this.)

And you can just as easily justify the cost—only \$49.95 for complete operating package. Which makes it affordable enough to have several.

## If you can use a phone, you can have GEM DESKTOP. Right Now.
