"Professional Quality Software You Can Count On, Now!"

WORD-STARTM

THE BEST GETS BETTER! Yes, in just a few months, thousands of users now know that WORD-STARTM is the word processing product that truly transforms the performance of Z-80, 8085, and 8080 microcomputers into a class with systems costing far more. Look at these recent enhancements: Print spooling; directory; foreign language adaptability; microspace justification; mailing list merge; CP/M*1.4, 2.0 & MPM compatible, and more. Examine our features and order yours now!

OVERVIEW OF WordStar

WordStar is a screen oriented, CP/M compatible, integrated word processing system specifically designed for non-technical personnel. Text and command functions are fully prompted (4 help levels) and performed on-screen with complete cursor tracking of all functions. Concurrent printing while editing improves operator productivity.

- Cursor-tracked Screen Display:** Under user control, the CRT screen acts as a moveable "window" into the text; all key strokes receive immediate visual updating.
- Automatic Disk Buffering:** Text is moved between disk and CPU memory with no user intervention. Thus, file size is limited only by disk capacity.
- On-Screen Printer-Image Text Formatting:** Using the default margins or user-set margins, entered text is automatically formed into right and left justified lines. Ragged-right is a user settable option. The Word-Wrap feature means that as you type past the right margin, the word being typed is moved to the left margin, justified and being typed in the margin settings and line. The previous line is redisplayed, justified and you can change the margin settings and settings (i.e., redisplay all or part of the text around settings). Partial re-justification allows cutting the text around an illustration or for any other purpose such as this paragraph.
- Split-Screen Help Menus:** Four user-settable levels provide the learning operator with comprehensive prompting instructions without the need to refer to a manual. Help levels may be changed at any time to allow full screen utilization.
- Status Line:** Constantly updated, the status line displays page number, cursor line and column, name of file under edit, and command(s), if any, in current operation.
- Powerful Editing Commands:** include delete character, word, line or block; set/clear variable tab stop; block move, copy, delete and output to disk; find/replace; write/read from/to additional files; set/return to place markers; on-screen insert toggle; and more.
- Dynamic Page Break Display:** A horizontal dotted line, not part of the text, is shown on the screen at the point a printer page break would occur. The page break line is dynamically repositioned when text entry or deletion affects page size. Visual edits of a print image allow even an inexperienced operator to perform sophisticated text composition.

WordStar Graphics (continued)

Concurrent Print Function: Editing and printing simultaneously.

Pagination and Formatting:

- User override of default top/bottom margins.
- User override of page length default.
- Variable heading/footer texts and page number locations.
- Conditional and absolute pagination directives.

Printer Support: A wide range of letter quality and line printers are supported including Diablo, Nec, and Qume, as well as bidirectional printing. Features supported include: Strikeout, Subscripts, Superscripts, Variable Character Pitch, Variable Line Height (6, 8, or your choice of lines per inch), and Alternate Ribbon Color are fully supported on Diablo, Nec, and Qume printers. Print enhancements may be used in all combinations. For example, underlined and boldfaced subscript are supported.

Microspace Justification: When

- Printing justified text on a daisy wheel printer, the white space in each line is evenly distributed.

WordStar is compatible with a wide variety of hardware, and can share files with other software:

CRT Compatibility: WordStar's video edit function will operate, on any CRT or video board 16 x 88, or larger that has cursor positioning functions and that is accessible as a CP/M console device.

New Features include:

- Directory display:** Using a triple split screen WordStar allows scrolling text, and CP/M file directory independently on screen.
- Install Program:** generates a version of WordStar for use on most popular terminals and printers without the need for any "patching". Allows full speed, 1200 baud, printer operation.
- Foreign Language:** As WordStar's menus and messages are mostly external to the operating program they lend themselves to translated versions.

MicroPro Price List:

	Software/Manual	Software/Manual	
Word-Star TM .	\$495/40	Super-Sort I TM .	\$250/25
Word-Master TM .	\$150/25	Super-Sort II TM .	\$200/25
Tex-Writer TM .	\$ 75/15	Super-Sort III TM .	\$150/25
