

## YOU PICK THE COMPUTER, MICROPRO™ MAKES IT PERFORM.

There are a lot of fine names in microcomputers. But there's only one name in software to remember. MicroPro. Because MicroPro has taken the best ideas in business software and put them together to make the MicroPro Software System™ — a family of software products that work together on your computer, whether it's an Apple™ II, TRS-80™ Model II, Heath/Zenith H/Z-89, Xerox™ 820, or more than 100 other brands — and soon the IBM® Personal Computer.

### Software makes the difference.

The key to getting the most out of your computer is the software you use. And the Software System is designed to get the most out, faster. The Software System is our new name for the MicroPro family of software products, each remarkably powerful and versatile — and even more so when you combine them.

The products: WordStar™ (word processing), MailMerge™ (WordStar option — personalized form letters and other file-merging uses); SpellStar™ (WordStar option — spelling checker); DataStar™ (data entry and retrieval); CalcStar™ (electronic spread sheet and financial modeling); SuperSort™ (sorting, selecting, and merging); and WordMaster® (video text editing).

### More solutions, less work.

The Software System enables you to use your micro-computer to its fullest with less time and effort. That's because, for one thing, most MicroPro products have similar methods of operation, so it's easier to move from one product to another. And they readily adapt to your way of doing business, instead of forcing you to make changes to fit a rigid software package, like you have to do with many other software products. Most important, you can combine MicroPro products' information and abilities. The result: a lot more ways to make your

business more productive than you'd get from just using each product by itself.

### The System doesn't stop.

Count on MicroPro to keep expanding the Software System with new products that make it even more useful and powerful in your business. Coming this year: a series of in-depth accounting packages; InfoStar™, a powerful report generator and partner to DataStar; and StarBurst™, a new kind of software that will link our products together into an even friendlier and easier to use package.

If you're shopping for a computer, we recommend you shop for software even more carefully. After all, there are a lot of good hardware systems to choose from. But there's only one Software System. From MicroPro.
