

It's the best thing since 1-2-3.

We asked current 1-2-3[®] users how to get more out of 1-2-3.

And you told us.

Introducing 1-2-3 Release 2 from Lotus.[®]

New 1-2-3 is more powerful and a lot more versatile.

You wanted to handle larger jobs with 1-2-3. Now you can. The new 1-2-3 worksheet has been expanded to 8192 rows—4 times its original size. And your worksheet is actually more flexible because advanced memory management allocates memory more efficiently and allows data to be stored anywhere on the worksheet. When used with new expanded memory boards, new 1-2-3 can address memory beyond 640K.

New 1-2-3 is designed to support the Intel[®] 8087/80287 math coprocessors so you can now do many calculations faster. We've even added some features that make it possible to do things like regression analysis, string functions and string arithmetic. And new 1-2-3 comes with 40 new macro commands so you can work more efficiently and a lot more productively.

Now you can start 1-2-3 directly off a hard disk without putting a system disk in the floppy disk drive.

But we still kept things simple.

In many respects, new 1-2-3 isn't any different from the original. You wanted us to keep things simple and we did. If you're already familiar with 1-2-3, you're ready to use new 1-2-3.

You don't have to retrain. And new 1-2-3 can read and process existing 1-2-3 files so that virtually all applications already developed can easily be used.

It's even easy to upgrade to new 1-2-3.

If you're a registered 1-2-3 user and want to upgrade to new 1-2-3, you'll find all the details in a mailing from Lotus. If you haven't registered yet, complete and send in your Warranty Registration Card or call 1-800-TRADEUP* so we can send you the mailing.

The cost of the Upgrade product is \$150. You are eligible for a free upgrade if you purchased 1-2-3 Release 1A on or after April 24, 1985.

And for everyone who upgrades, there's also a rebate offer of \$40 on the Intel Above[™] Board, the first expanded memory board certified by Lotus.

We think you'll find new 1-2-3 the best thing since, well, 1-2-3.
