

PROGRAMMERS SYSTEMS ANALYSTS

The more you expect
from a career...
the quicker you should
contact us.

At a time when many companies are winding down . . . or experiencing shutdowns . . . a high level of activity at Bell Labs is creating a significant number of long term professional opportunities.

We seek career oriented programmers and systems analysts with 3 or more years applicable experience. Positions offer high interest assignments in support of technical and administrative activities.

COMPUTER CENTERS

The centers provide general purpose computing facilities and operating systems software support to the Bell Laboratories community. This support is provided either on site at specific locations or at remote computers via a highly sophisticated network. Current openings require expertise in maintaining the following:

- **MVS/JES 3/TSO Software.**
IBM Assembly language and SMP 4 proficiency also required. TCAM and data communications experience highly desirable.
- **UNIX™ Operating System.**
Knowledge of SHELL Programming, "C" Programming language, and DEC computer hardware also very desirable.
- **COMTEN Software in a TSO/TCAM/NCP Environment.**
TCAM, ACS/TCAM, VTAM, and ACF/VTAM experience a plus.

BUSINESS SYSTEMS & APPLICATIONS

These organizations provide computer-based support for administrative functions, i.e. financial, personnel, text processing, management information and electronic office systems. Expertise is required in the following areas:

- Design and development of business applications data base systems. Experience with at least one programming language (FORTRAN, COBOL, PL/1, ADABAS/COM-PILETE) in an IBM based environment such as VM or MVS required. Also, familiarity with IBM, JCL and RAMIS desirable.
- Office automation systems experience, especially using the UNIX™ Operating System and the "C" programming language.
- Systems engineering and distributed data base design.
- Telecommunications, especially networking.
- Hardware and software knowledge of mini and micro computers.

Positions are at attractive sites in various suburban New Jersey areas. Salaries and benefits are excellent.

The sooner you provide us with your qualifications, the sooner you can take an active role in one of these high potential positions. Send confidential resume detailing education, experience and salary expectations to: **Ms. V. Furman, Ref. ATS-70, 150 J.F. Kennedy Parkway, Short Hills, NJ 07078. No fees paid.**
