

# SCO® OpenServer Release 5

## Features:

- High-performance, low-cost Host and Enterprise server operating system configurations for Intel® processor-based platforms
- Minicomputer and RISC levels of Reliability, Availability, Serviceability (RAS) and Scalability
- Largest business critical applications base (over 10,000 applications supported); widest range of business hardware, network, and peripheral support
- Extensible interoperability with PC LANs, WANs, legacy systems and the emerging commercial Internet
- Integrate DOS and Windows™ PC desktop environments into today's client/server business critical environments
- Graphical system administration and software management facilities for managing both local and remote systems

## Benefits:

- SCO OpenServer systems deliver the top value for today's and tomorrow's business critical computing
- Achieve minicomputer levels of reliability and scalability available for today's cost-effective business critical servers
- Maximize the effectiveness of business servers by utilizing the world's greatest selection of business critical solutions
- Integrate networked systems and the Internet into a single efficient environment to access and use information as a competitive advantage
- Easily integrate Windows systems and leverage user skills without starting all over again
- Speed and simplify the deployment, management and maintenance of distributed business critical server

*SCO OpenServer Release 5 excels at running multiuser, transaction-based DBMS and business applications, Internet and Web services, mail and messaging services, communications gateway, and integrating PC LAN environments and legacy systems into a single efficient environment.*

## The Leading Business Critical Server

SCO OpenServer is today's leading UNIX® server operating system for Intel processor-based platforms. SCO OpenServer systems run critical day-to-day business operations for organizations such as BMW, the NASDAQ Stock Market, Taco Bell, and government agencies, as well as small to medium-sized businesses of every kind. Businesses use SCO OpenServer systems to simplify and speed business operations, better understand and respond to their customers' needs, and achieve a competitive advantage.

SCO OpenServer systems excel at running multiuser, transaction-based DBMS and business applications, communications gateways, and mail and messaging servers in both host and client-server environments. No other company can match SCO's 16-year track record of bringing business critical solutions to the Intel platform. SCO OpenServer systems support more business applications, advanced Intel processor-based hardware, multiprocessor systems, peripherals, development tools, internetworking, and service options than any other business server environment.

Designed expressly for business critical computing, SCO OpenServer systems deliver what today's organizations are seeking – exceptional value and price-performance, extensible networking with existing LANs and WANs, easy integration with Windows desktops, built-in Internet access and services, simplified administration and management, and outstanding scalability for long-term growth.

SCO OpenServer Release 5 has been recently enhanced to include SCO Advanced File and Print Server (licensed for single client access), SCO ARCserve/Open Lite from Cheyenne, SCO Doctor Lite, and additional language support in the operating system for French and German.

# SCO OpenServer Technical Specifications

## SCO OpenServer Product Family

Join the millions of users who rely on the leading business critical server. The SCO OpenServer family includes host and network-ready server operating system configurations, and a complete suite of layered products and services. Layered products include:

- Windows Services – For connecting Windows users to SCO OpenServer
- RAS Services – RAID and SMP add-ons for high reliability, availability and scalability
- Systems Management – For Network Systems Management
- Internet Services – A complete set of leading Internet products
- Distributed Services – A full line of OSF® DCE products and development tools
- Development Services – A wide range of development tools and compilers

To ensure your success with SCO OpenServer systems, they're backed by a complete range of expert services available from SCO and SCO providers. Expert services include:

- Professional Services – On-site engineering, and consulting
- Education Services – System administrator and developer training
- Support Services – Technical product support

SCO OpenServer systems support all of the major business critical database platforms, including Sybase, Oracle, Informix, and Progress; all popular compilers, including FORTRAN, COBOL, BASIC®, C; and a wide range of advanced tools for developing client/server applications.

The result – SCO OpenServer delivers the widest choice of business critical computing solutions, which can be specifically matched to your business critical computing requirements.

### Core Operating System

- UNIX 5.0 Kernel • 32-bit multi-user, multi-tasking
- High Throughput Filesystem, Filesystem Journaling
- Online backup/restore, Dynamic Kernel Tables
- 900+ hw systems, 2000+ hw peripherals supported
- Fixed priority scheduling (soft real time)
- Symmetric Multiprocessing Ready (SMP)
- Class, DLL, and SCO Visual Tcl libraries included
- UPS support and Advanced power management

### Graphics/Interface Support

- X Window System X11R5, Motif Window Manager
- Wintif (converts Motif apps to Windows appearance)
- X.desktop with Panter™ (multi-screen desktop viewer)
- Personal and Control Applets (accessories, and controls)
- Groupware Applets (email, calendar)
- Extensible SCO Visual Tcl and Graphical On-line help

### Systems Administration/Software Management

- SCO Doctor Lite (Server systems management)
- SCO ARCserve/Open Life (Server backup and restore)
- Graphical and Character Administration (dual mode support)
- Local and Remote administration and maintenance
- Software Version Control, Asset Tracking and Management

### Networking

- SCO Advanced File and Print Server (single client access)
- PC Interface (PC connectivity for serial lines/networks)
- POP3 Server (Post Office Protocol for mail systems)
- TCP/IP (SNMP, SMUX, PPP) (standard network protocol)
- NFS (NIS) (distributed file system support)
- LAN Manager Gateway (supports Lan Manager file/printer access)
- IPX/SPX (NetWare protocol for DBMS/applications integration)
- SCO Gateway for NetWare (supports NetWare file/printer access)
- NCSA Mosaic Internet WWW browser • Network install and update

### Requirements/User License/Standards:

- Memory, Minimum/Maximum
- Disk, Minimum
- User Licenses (10, 25, 100, 500, Unlimited-User License Packs)
- Standards .

### SCO OpenServer Layered Products

#### Windows Services:

- SCO Merge (DOS/Windows on SCO OpenServer)
- SCO Wabi (High-performance Windows services on SCO OpenServer)
- SCO Advanced File and Print Server (Windows client/server solutions)
- SCO TermVision™ (Terminal Emulation for Windows)
- SCO SuperVision™ (Remote desktop administration)
- SCO X Vision™ (PC X and Terminal Emulation for Windows)
- SCO SQL-Retrieve™ (Windows ODBC to UNIX DBMS)

#### RAS Services:

- SCO SMP (License for up to 30 processors)
- SCO Virtual Disk Manager (Software RAID 0, 1, 5)
- SCO ARCserve/Open (Network client/server backup and restore)
- SCO Doctor (Network system management)

#### Internet Services:

- Netscape Navigator (Communications, Commerce and Proxy Servers)
- Oracle WebServer
- SCO Internet to NetWare Gateway
- SCO PPP from Morning Star
- SCO Internet Security Package

#### Distributed Services:

- SCO Security Services (TCP/IP network security) • SCO X.500 Directory Services
- SCO Distributed Administration Service (For all DCE systems)
- SCO DCE Executive • SCO DCE Cell Directory Service

#### Developer Services:

- SCO OpenServer Development system
- SCO DCE Development Kit (With full DCE services)
- SCO POS Configuration Toolkit (custom os configuration)
- SCO AHDK (Advanced Hardware Developers Kit)
